

## TRACKER CG-30-TWIN

### Twin Head Straight Line Gas Cutting Machine

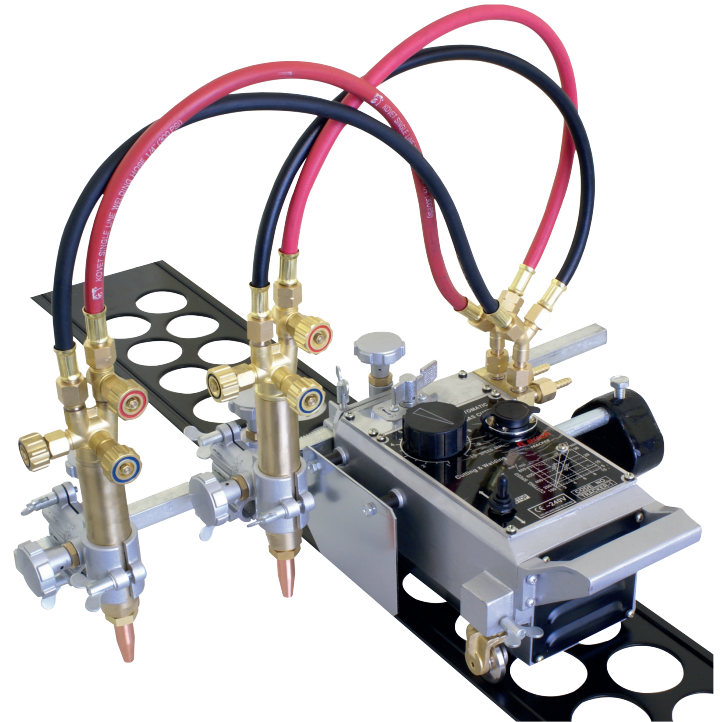

The TRACKER CG30 TWIN is a step-less variable speed carriage with two oxy/fuel gas cutting torches mounted on a straight line track. Built to industrial standards the CG30-TWIN provides high quality oxy/fuel cuts on steel plates and structures where straight line accuracy is paramount. With addition of the CG30 Circle Cutting Attachment the CG30-TWIN will cut circles and flange bodies with a high degree of accuracy.

The TRACKER CG30 TWIN is the low cost, high quality, value alternative. It is known around the world as one of the best portable cutting machines in the industry.

### XG-CG30-TWIN

#### Technical Data
